UPLIFT CODE CAMP EXPERIENCE

Projects Created:

Movie Notepad
https://movienotepadclient.onrender.com/

A full stack application developed by using MERN stack. It is an application where user can add movie or series by providing details/information about a specific movie. It is also an application where user can add movies to their watchlist and add notes to a specific movie in the watchlist.

Mini Messenger
https://minimessenger.onrender.com/

A fullstack application developed using MERN stack with socketIO. It is a simple application that almost look like messenger where user can communicate with one another, it is a very simple application that uses socketIo for realtime communication

Eatstagram
https://proj6-fe.onrender.com/

A full stack application developed by using MERN stack. It is an application developed by Uplift Code Camp Batch12. It is an application where you can upload photos of your favorite foods, you can interact to other photos that was uploaded by other users as well.

Personal Portfolio
https://phol.vercel.app/

A Web-Based application developed by using React JS. This showcase my skills and projects created. It also shows details about me.
